

Requirement/Development of Sustainability

Sustainable Development, as defined in 1987 by the Brundtland Commission (formally known as the World Commission on Environment and Development (WCED)).

“Development that meets the needs of the present without compromising the ability of future generations to meet their own needs.”

Start of Sustainability Journey

- In 2022-2023, we have engaged in an initiative named The Zero Carbon Project (TZCP) launched by our strategic customer as an effort to mitigate environmental impacts by reducing GHG emissions.
- We started with the **“THE ZERO CARBON PROJECT”**. Under this project POWERMAT got opportunity to know scientific way/method of calculating the emission in the category of Scope 1 & scope 2, under awareness and support of SE.

Target for Sustainability

	Base Year - 2020	Most recent Year - 2023
Scope 1 emission in Tons	55.87	14.75
Scope 2 emission in Tons	902	874

- 1. Our CO₂e intensity (per unit of sales) was <decreased> by 51.70% from 2020 to 2023.**
- 2. Our target is to reduce CO₂e intensity (per unit of sales) by 60% by 2025.**
