How To Compose SMS In Hindi or other Languages

The screenshot shows a web interface for sending SMS. At the top, there is a header with 'v5.0' on the left and 'Logout | IP : 196.232.13.114' on the right. Below the header, there is a navigation menu on the left with options like 'SMS Panel', 'Management', 'Scheduled SMS', 'Manage SenderIds', 'Manage Groups', 'Manage Black List', 'Delivery Report', 'Report for API/Custom', 'Archived Delivery Reports', and 'MIS Report'. The main content area is titled 'Send SMS (Other Languages)'. It contains a form with the following fields: 'Enter Mobile Numbers' (with the value '6788765456'), 'Write Message' (with the value 'हिंदी समाचार'), 'Chars. count' (with the value '12'), 'SMSs. count' (with the value '1'), and 'SenderId' (with the value 'TSTREG'). There is a 'Continue....' button at the bottom of the form. On the right side of the form, there are 'Instructions' for text messages, including character counts and a note about sending test SMS.

- First click on first option **हिंदीभाषा**
- Then in 'Enter Mobile Number Box', enter Mobile Numbers here or you can copy paste the Mobile Numbers
- In "Write Message Box" enter your Message here apart from that you can check your "Character Count" as well as "SMS Count" too
- Select your "SENDER ID"
- Then click on Continue button then you will get a confirmation page
- There will find 2 options "Schedule Now" and "Send" as shown below
- Click on Send Now

f. Click on Send Now

[How To Compose SMS

The screenshot displays a web interface for SMS management. On the left is a navigation menu with options like 'SMS Panel', 'Management', and 'Scheduled SMS'. The main content area is titled 'Send SMS to Individual'. It includes a header with 'ProfileID: 25690', 'Member Type: Client', 'UserID: t1testingsms', and 'Expiry Date: Friday, September 25, 2020'. Below this, there are checkboxes for 'Is DND Filtered', 'Is Trans. Templates', and 'HTTP API Enabled'. The main form has a 'Enter Mobile Numbers' field with the value '8786743562'. Below it, there are '+Group' options for '8802221320 (0)', 'Delhi (3)', and 'Mumbai (2)'. A 'Write Message' field contains 'HI THIS IS TEST'. To the right, 'Instructions' specify character counts for SMS credits: 1-160 characters = 1 SMS Credit, 161-306 characters = 2 SMS Credits, and 307-459 characters = 3 SMS Credits. There are also checkboxes for 'Allow Long Message', a 'SenderID' dropdown set to 'TSTREG', and a 'Continue...' button.

***Note: - Message Instruction is given on the right hand side**

(For Text Message)

1-160 characters = 1 SMS Credit

161-306 characters = 2 SMS Credits

307-459 characters = 3 SMS Credits

- Click on **“Send SMS”** Tab
- In **“Enter Mobile Number”** box mention Mobile Number(s) there or you can select **“+Groups”** also which is given below the Mobile Number(s) box
- Then in **“Message Box”** enter your message
- For sending Long SMS you have to click on check box which is given below **“Allow Long Message”**
- Select your **“Sender ID”**
- Then click on **“Continue”** button

- g) You will get a Confirmation page, where you will get 2 options **“Send Now”** and **“Schedule SMS”**
- h) Click on Send Now

[How To Send **BULK** SMS

- a) Click on **“Send Bulk SMS”**
- b) In **“Write Message Box”** enter your message
- c) For Long SMS click on check box **“Allow Long Message”**
- d) Select your **“Sender ID ”**
- e) Click on **“Choose File”** upload your file there (*file format should be **“.TXT”** or **“.CSV”**)*

***Note: - Maximum File Size 1, 00,000 Number only**

- f) Then click on **“Continue”** button
- g) You will get a Confirmation Page, where you will get 2 options **“Send Now”** or **“Schedule SMS”**
- h) Click on Send Now

[How To Send **Customized** SMS (English)

The screenshot displays the 'Write Customized SMS Details' form on the SMS4power.com website. The form contains the following elements:

- Write Message:** A text box containing 'dear #A2#'. Below it, instructions state: 'To Send Customized SMS for file format like mobile, A2, A3, A4, A5, A6, A7, A8. To use column in message Type #A1# for mobile, #A2# for A2, #A3# for A3 and so on... NOT use #A1# variable in message box as this is fixed for mobile number only. Instructions'.
- SenderId:** A dropdown menu currently showing 'TSTREG'.
- Upload File:** A button labeled 'Choose File' with the text 'No file chosen (Sample File)'. Below it, it specifies '(.csv file only)' and '(maximum file size 50,000 numbers only.)'.
- Options:** Two radio buttons are present: 'Send Now' (which is selected) and 'Schedule for Later'.
- Buttons:** A 'Send SMS' button is located at the bottom of the form.

The left sidebar menu includes the following items:

- Welcome Dear Test SMS, Current Balance :38
- SMS Panel**
 - हिंदी व अन्य भाषाएँ
 - हिंदी व अन्य भाषाएँ (Bulk Upload)
 - Send SMS
 - Send SMS (Bulk Upload)
 - Customized SMS (English)**
 - Customized SMS (Hindi)
 - Split Schedule (Bulk Upload)
- Management**
 - Scheduled SMS
 - Manage SenderIds
 - Manage Groups
 - Manage Black List
 - Delivery Report
 - Report for API/Custom
 - Archived Delivery Reports

The URL at the bottom left is sms4power.com/customizedSMSSch.asp.

- a) Click on **“Customized SMS (English)”** Tab
- b) In **“Message Box”** enter your message

***Note :- To Send Customized SMS for file format like mobile, A2,A3,A4,A5,A6,A7,A8 To use column in message Type #A1# for mobile, #A2# for A2, #A3# for A3 and so on...**

**Don't use #A1# variable in message box as this is fixed for mobile number only.
In Excel Sheet or Notepad first column always should be Mobile Number**

- c) Click on "Choose File" upload your file there (File Format should be ".CSV" or ".TXT")
- d) Select your "Sender ID"
- e) Then click on "Continue" button
- f) You will get a Confirmation Page, where you will get 2 options "Send Now" and "Schedule SMS"
- g) Click on Send Now

[How To Send Customized SMS (Hindi)]

 Send Now Schedule Later

Send SMS

- a) Click on "Customized SMS (Hindi)" Tab
- b) In "Message Box" enter your message

***Note :- To Send Customized SMS for file format like mobile,A2,A3,A4,A5,A6,A7,A8 to use column in message Type #A1# for mobile, #A2# for A2, #A3# for A3 and so on.**

- c) Click on "Choose File" upload your file there (File Format should be ".CSV" or ".TXT")
- d) Select your "Sender ID"
- e) Then click on "Continue" button
- f) You will get a Confirmation Page, where you will get 2 options "Send Now" and "Schedule SMS"
- g) Click on Send Now

How To Use Split Scheduler

The screenshot shows a web interface for SMS scheduling. On the left is a navigation menu with 'SMS Panel' and 'Management' sections. The main content area is titled 'Input Bulk SMS Details' and contains the following fields and options:

- ProfileID: 25690, UserID: t1testingsms, Member Type: Client, Expiry Date: Friday, September 25, 2020
- Language: English (selected), Hindi (Other Languages)
- Write Message: hi, this is test
- Allow Long Message:
- Chars. count: 16, SMSs. count: 1
- SenderId: TSTREG
- Upload File: Choose File (No file chosen), (Sample File)
- (.txt or .csv file only)
- (*maximum file size 5,00,000 numbers only.)
- Schedule Start From: Date (05), Month (May), Year (2020), Hours (12), Minutes (15)
- Mobiles In One Batch: 1000
- Interval Between Each Batch: 30 Minutes
- Add My Numbers In Each Batch: 8787656787
- Buttons: Schedule Now, Cancel

- Click on **“Split Schedule”** Tab
- Select Language
- In **“Write Message Box”** enter your message
- Select your **“Sender ID”**
- Click on **“Choose File”** upload your file there (*Format of file should be “.TXT” or “.CSV”*)

***Note:** - Maximum file size 5,00,000 Numbers only

- Move your cursor to **“Schedule Start From”**, then Select Date and Time whenever you want to schedule your SMS
- Go to **“Mobile in One Batch”** here you have to mention quantity of number that you want to send in one batch
- In **“Interval Between Each Batch”** you have to mention the duration here, how much duration you want between each Batches
- In **“Add My Number in Each Batches”** here you have to mention your Mobile Number
- Then click on **“Schedule Now”**

[What Is Schedule SMS?

You can schedule your SMS text messages to be sent at a future date and time - up to a year into the future. It can also be used to set up a reminder message the day before an appointment, meeting or event and at if you are not able to access your system at that time, you can schedule your message for later.

[How To Schedule SMS

The screenshot shows a web application interface for scheduling SMS. At the top, there is a navigation bar with a home icon, the text 'v5.0', and a 'Logout | IP : 103.75.34.178' link. On the left, there is a sidebar menu with a 'Welcome Dear Test SMS, Current Balance :38' message. The main content area is divided into two sections. The top section displays user information: 'ProfileID: 25690', 'Member Type : Client', 'UserID: t1testingsms', and 'Expiry Date: Friday, September 25, 2020'. There are also checkboxes for 'Is DND Filtered', 'Is Trans. Templates', and 'HTTP API Enabled'. The bottom section shows a calculation based on entered criteria: 'Message : hi,this is test', 'Sender Id : TSTREG', 'No Of Messages Count : 1', 'Total Mobiles Posted : 1', 'Total Credits To Be Deducted : 1 (correct Numbers * No.of MSG Count) : 1', and 'Balance in your account : 38'. Below this, there are two buttons: 'Send Now' and 'Schedule SMS'. At the bottom, there is a 'Schedule On' section with dropdown menus for Date (05), Month (May), Year (2020), Hours (12), and Minutes (30), and 'Submit' and 'Cancel' buttons.

- Go to **“Compose SMS”** or **“Send Bulk SMS”**
- Follow the Compose SMS / Send Bulk SMS option
- Click on **“Send SMS Now”**
- You will get options for **“Send Now”** and **“Schedule”**
- Click on the radio button of **“Schedule”**
- Set your Date and Time (*Time & Date you want to send your message*)
- Click on **“Send SMS Now”**

[How To Change Date & Time of Scheduled SMS

- Click on **Scheduled SMS** (Under Delivery Report)
- Click on “Reschedule Tab”
- Change the Date and Time of SMS

[How To Delete a Scheduled SMS

- Click on **Scheduled SMS** (Under Delivery Report)
- Click on “Delete Link”
- Balance will automatically credit into your account accordingly

[What Is a Template?

Template is used to save your message content. If you need to use a same message content for sending SMS and want to prevent typing your message content again and again. You can use Template option where you can save your message contents and by clicking only you can paste the same into Message Box.

[How To Create and Select a Template

Message saved as template.

- Click on “**MIS Report**”
- Select Months
- You will get Result
- You can download it from there day wise

[How To Change Password

The screenshot displays a web application interface for SMS4power.com. On the left is a navigation menu with sections: 'SMS Panel' (containing options like 'हिंदी व अरब भाषाएं', 'हिंदी व अरब भाषाएं (Bulk Upload)', 'Send SMS', 'Send SMS (Bulk Upload)', 'Customized SMS (English)', 'Customized SMS (Hindi)', 'Split Schedule (Bulk Upload)'), 'Management' (containing 'Scheduled SMS', 'Manage SenderIds', 'Manage Groups', 'Manage Black List', 'Delivery Report', 'Report for API/Custom', 'Archived Delivery Reports', 'MIS Report'), and 'Utilities' (containing 'Change Password'). The main content area shows a user profile with 'ProfileID: 25590', 'Member Type: Client', 'UserID: t1testingsms', and 'Expiry Date: Friday, September 25, 2020'. There are also status indicators: 'Is DND Filtered', 'Is Trans. Templates', and 'HTTP API Enabled'. Below this is a 'change Password Utility' form with three input fields: 'Current Password', 'New Password', and 'Re-Type New Password', followed by a 'submit' button. The URL 'sms4power.com/changePWD.asp' is visible at the bottom right.

- a) Click on **“Change Password”** under Utilities Section
- b) Enter your *“Current Password”*
- c) Enter your *“New Password”*
- d) Re-type your *“New Password”*
- e) Click on Submit

[Where Is Credit History Located

- a) Click on **“My Transactions”** under Utilities Section
- b) You will get the Results

[How You Can Edit Your Profile

- a) Click on **“My Profile”** under Utilities Section
- b) Edit whatever you want to edit
- c) Click on Submit

[How To Use HTTP API

a) Click on "HTTP API" under Utilities Section

| Variable | Value | Explanation |
|----------|------------------------------|--|
| username | Login ID | This is the user ID which you select at the time of registration |
| password | Password | Password |
| sender | Sender ID | You may have multiple sender IDs at website but you need to choose one |
| send to | 919xxxxx,919yyyyyyy,919zzzzz | Write comma separated mobile numbers with 91 as prefixed You can send at the most 100 numbers in one go. |
| message | The text you want to send | The text you want to send. |

1. API Single Message To Single Recipient

***Note :** Method of Post should always be "GET"

For example try to send this string from web browser

<http://sms4power.com/api/swsendSingle.asp?username=xxxx&password=xxxx&sender=senderId&sendto=919xxxx&message=hello>

| Variable | Value | Explanation |
|----------|------------------------------|--|
| username | Login ID | This is the user ID which you select at the time of registration |
| password | Password | Password |
| sender | Sender ID | You may have multiple sender IDs at website but you need to choose one |
| send to | 919xxxxx,919yyyyyyy,919zzzzz | Write comma separated mobile numbers with 91 as prefixed You can send at the most 100 numbers in one go. |
| message | The text you want to send | The text you want to send. |

2. API Single Message To Multiple Recipient

***Note :** Method of Post should always be "GET"

For example try to send this string from web browser

<http://sms4power.com/api/swsend.asp?username=xxxx&password=xxxx&sender=senderId&sendto=919xxx&message=hello>

3. API Message in Unicode (Other Languages – हिन्दी व अन्य भाषाओं में भेजें)

***Note :** Method of Post should always be "GET"

For example try to send this string from your software

Message = यह परीक्षण संदेश है

```
http://sms4power.com/api/swsendUni2.asp?username=xxxx&password=xxxx&sender=senderId&sendto=919xxxx,919xxxx&message=यह परीक्षण संदेश है
```

| Variable | Value | Explanation |
|----------|---------------------------|---|
| username | Login ID | This is the user ID which you select at the time of registration |
| password | Password | Password |
| sender | Sender ID | You may have multiple sender IDs at website but you need to choose one |
| send to | 919xxxx,919yyyyyy,919zzzz | write comma separated mobile numbers with 91 as prefixed You can send at the most 100 numbers in one go.(multiple recipient) |
| message | The text you want to send | The text you want to send. |

4. To Get The LIVE Delivery Report

| Variable | Value | Explanation |
|----------|--|---|
| username | LoginId | This is the userId which you select at the time of registration |
| password | Password | Password |
| sender | SenderId | You may have multiple senderIds at website but you need to choose one |
| sendto | 919xxxx,919yyyyyy,919zzzz | write comma separated mobile numbers with 91 as prefixed You can send at the most 100 numbers in one go. |
| message | The text you want to send | The text you want to send. |
| dlrUrl | The Url where you want to receive the delivery reports | http://yourServer_Url?logID=\$logID\$%26phNo=\$phNO\$%26result=\$result\$ |

Explanation of the dlrUrl Variable

Server_Url: It is the URL where you want to receive the Report

This URL is created by you on your website

The Text after (?) (The query String) will remain same for all

Finally the complete URL to send SMS with Delivery Report will look something like

```
http://sms4power.com/api/swsend.asp?username=xxxx&password=xxxx&sender=senderId&sendto=919xxxx,919xxxx&message=hello&dlrUrl=http://yourServer_Url?logID=$logID$%26phNo=$phNO$%26result=$result$
```

| Variable | Value | Explanation |
|----------|----------|--|
| username | Login ID | This is the user ID which you select at the time of registration |
| password | Password | Password |

5. Check Balance

Post the above variables to <http://sms4power.com/api/checkbalance.asp>

***Note :** Method of Post should always be "GET"

For example try to send this String from Web Browser

```
http://sms4power.com/api/checkbalance.asp?username=xxxx&password=xxxx
```

- Here you will get you API Link
- PDF is also provided in the panel **"API Codes"**

[How To Find UNICODE

- Click on **"Find Unicode"** under Utilities Section
- Then copy and paste your content in the box
- Click on *"Find Unicode Data"*
- You will get a Filtered content in plain text box
